EVENTS & COMMUNICATION

MICE & PRIVATE EVENTS

MEETINGS | INCENTIVES | CONFERENCES | EXHIBITIONS | CELEBRATIONS | AWARDS

Eventuais is a company passionate about **events and communication**, offering full-service solutions in both areas.

In **MICE and private events** (meetings, incentives, conferences, exhibitions & celebrations) from a global perspective, we start by forming a team with the client during the planning phase, ensuring project management, communication, production, and the provision of services and equipment for its complete realization.

In other cases, we may be the solution for only part of the event: hiring national and international artists, entertainment, audiovisuals, multicam, and livestreaming, structures, lighting, decoration, activities, and entertainment equipment.

In the communication field, we dedicate ourselves to developing the strategy and producing relevant content through copywriting, design, 3D, photography, and video services. We create stands, advertising films, and work on digital solutions (apps, websites, and digital marketing).

A group of people in traditional Portuguese folk costumes are dancing in a public square. In the background, there is a large, ornate archway with intricate carvings and a statue on top. The scene is set in a bright, sunny environment with a clear blue sky. The overall atmosphere is festive and cultural.

Portugal has emerged as a prime destination for hosting **MICE** (Meetings, Incentives, Conferences, and Exhibitions) events, increasingly attracting companies seeking a conducive environment for unique and successful experiences.

One reason companies consider Portugal the ideal location for these events is its diverse range of destinations that cater to various needs and preferences. The rich culture and exceptional gastronomy, combined with the warm hospitality and welcoming culture of the Portuguese, are other distinctive features contributing to the success of MICE events in our country.

In addition to the aforementioned advantages, attention to detail and the professionalism of local services are fundamental factors in creating a conducive environment for business and networking.
